

idealpos7 Update History

Build 51

Update Details:

** Enhancements

* [IP-1664] - Konami: support for Use Membership ID option

* [IP-1676] - Cash Drawer baud rate support for 6 digits

Global Options

Gaming Interface – Konami: Support for Use Membership ID option

The Konami Interface has been updated with an option to 'Use Membership ID'.

This function will retrieve the Konami Membership Number which will be used as the Customer Code if the 'Add Members to POS' is selected. If 'Use Membership ID' is unchecked, Idealpos will use the Card Number when creating the Customer.

Go to Setup > Global Options > Gaming > Gaming Interface > Interface Type: Konami > Use Membership ID

Setup - POS Terminals

Cash Drawer baud rate support for 6 digits

The baud rate setting has been updated to support a 6-digit length baud rate.

The baud rate should not be changed unless the POS terminal is being re-configured or a new/replacement Cash Drawer is being installed.

Go to Setup > POS Terminals > Modify > Other Peripherals > Cash Drawer > Baud

The screenshot shows a configuration window titled "Cash Drawer". It contains the following fields and controls:

- Connection:** A dropdown menu with "None" selected and a "Test" button to its right.
- Pulses:** A text input field containing "125".
- ASCII Character:** A text input field containing "0".
- Baud:** A text input field containing "19200".
- 2nd Drawer:** A dropdown menu with "None" selected and a "Test" button to its right.
