

Connect your physical store's POS System to a whole world of online customers with the WooCommerce Interface from Idealpos.

## Integrated Platform For All Your Sales

Idealpos Version 8.0 and WooCommerce provides a single integrated platform to sell to customers looking to buy your products. Create marketing campaigns that integrate to social media so the right people see your store!

## Sync to WooCommerce

Idealpos Version 8.0 manages the Items you want to sell online. New Products, Price Updates, and Deletions are all synced directly to your online store.

## Product Organisation

Idealpos Version 8.0 supports Tags to organise products by category, group, style, type and more. Produce reports in Idealpos grouped and filtered by Tags too!

## Product Variations

Do you sell variations of a product? Let Idealpos 8.0 automate the creation of these products, where the parent item can select up to three variant types (E.G. size, colour, style).

## Online Orders Sync to POS

Once an order is placed in WooCommerce, it will automatically Sync with your Idealpos POS system in Store. Stock levels will be updated in the POS.
