Select 1. POS Integrations

Select 1. Authorise POS

The device will display a Pairing Code.

In Idealpos, enter the code into the Pairing Code field and press Pair. You have approx. 30 seconds to do this before the Pinpad will reset and you will need to restart the procedure to get a new pairing code.

Once paired, the Pinpad will display a Pairing Complete and Idealpos will display a confirmation message.

idealpos7 Update History

PinPad has been Paired with POS 1

OK

The Pinpad will display the details from Idealpos' Licencing Gateway, including the POS terminal it's connected to.

Registered Licence Information

POS Number: 1

Company Name: Idealpos user

Trading Name: Idealpos user

If for some reason Idealpos can't pair with the Pinpad, a message will display on-screen. Go through the steps again to ensure everything was entered correctly. If there is still any issues, you will need to contact SmartPay.

Gaming Override Options

Konami support two different point totalizers, Standard and Comp. They need to be entered correctly or they will not work. It's very important to ensure that the Code field is setup correctly. Standard must remain blank, Comp must include the word Comp. Any point values are configured y Konami, but we must match them in Idealpos.

Go to Gaming Points > Enter the point totalizer details.
