  - \* [IP-1839] Embedded Marketing Website into Dashboard to advertise Idealpos Online
  - \* [IP-1843] Gift Vouchers will hide Expiry Date when Expiry Days 99999

## **Customers – Customer Types**

#### Inhibit Manual Subtotal Discounts by Customer Type

This function allows you to stop Subtotal Discounts from being applied to specific Customer Types. This is useful if you want to stop particular types of customers from receiving subtotal discounts when a sale is being finalised on a POS terminal.

To inhibit manual subtotal discounts from applying to a Customer Type, Go to File > Customers > Customer Types > Select Customer Type > Modify > Inhibit Manual Subtotal Discounts

| customer types |   |                                      |     | ×            |
|----------------|---|--------------------------------------|-----|--------------|
|                |   |                                      |     |              |
|                |   |                                      |     |              |
|                |   |                                      |     |              |
|                | Code  |                                      |     |              |

Leave the Output File Format as Standard to export the data in a single line/row or change it to Single Column to export data in a single column.

All the Export Fields can be left as selected or you can deselect any fields that are not required.

Press the OK button.

A prompt will appear allowing you to choose a location and filename for the exported data.

## **Functions**

### Safe Drop function – Option to open the Cash Drawer

This function adds the ability to open the Cash Drawer when using the Safe Drop function at the POS terminal.

Go to Setup > POS Screen > POS Screen Setup > Buttons > Select Blank Button > Function > Safe Drop > Open Cash Drawer

| Safe Drop           |   |  |
|---------------------|---|--|
|                     |   | Safe Drop  |
|                     | Open Cash Drawer                        | Safe Drop<br>Sale Reference<br>Sale Type<br>Scale On/Off<br>Seat Number<br>Send Message<br>Stock Item<br>Stock Item Edit |
| - Button Appearance | Button Caption                          | Stock Item Sales<br>Stock Item Search  |
| Safe Drop           | Safe Drop                               | Stock Location   |
|                     | Back Colour Font<br>Text Colour A ▲ A ▼ | Stock Notes<br>Subtotal Discount<br>Table  |
|                     | Double Width Visible 🗹                  | Table Summary<br>Tax Invoice<br>Tax Shift  |
| Graphic             | >                                       | Tender<br>Tender Correct   |
| <u>F</u> ormat All  | <u>S</u> ave <u>C</u> ancel             | Text Entry (Hash)<br>Text String<br>Transfer Mode  |

When the Safe Drop button is pressed on the POS Screen, the Cash Drawer will open.

## **Gift Vouchers**

### Gift Vouchers will hide Expiry Date when Expiry Days 99999

This function allows Gift Vouchers to print without an Expiry Date when the Expiry Days have been set to 99999.

Go to Setup > Global Options > Credit Notes/Gift Vouchers

|          | global      | options                              |             |             |              | si       | ite 1 (Site 1)      | I                           |          |          |                                |             | S                                     | ×      |

In the Expiry Days column, enter a value of 99999 to set that type of Gift Voucher to never expire. By doing this, the Gift Voucher will print without an expiry date.

| Gift \ | /ouchers          |             |
|--------|-------------------|-------------|
|        | Gift Voucher Type | Expiry Days |
| 1      | Gift Voucher      | 99999       |

At the POS Screen, sell the Gift Voucher by pressing the 'Gift Voucher' button.

Then enter the Gift Voucher value and the Customer Name for who the Gift Voucher is for. If the Customer does not exist, leave the Customer Name field as blank and press the OK button.

## **Global Options**

### Gaming Interface – Konami Gaming – Get Member by House Number

Idealpos previously looked up active members by sending a GMID number to the Konami Gaming System.

However, the GMID number was not known or easily remembered by staff at the venue.

The venue identifies machines by the House Number.

Therefore, Idealpos has been updated so that the House Number is sent to the Konami Gaming System instead of the GMID number.

### **Import Data**

#### **Auto Import Promotions**

This function allows Promotions to be imported into Idealpos automatically.

Go to Setup > POS Terminals > Select POS Terminal > Modify > Import/Export > Automatic Import Settings

| Automatic Import 9 | Settings   |   |
|--------------------|--|---|
| Import Folder      | C:\Import  | > |
|                    | Delete files older than 7 days                                     |   |
|                    | <ul> <li>Delete files after importing</li> </ul>                   |   |
|                    | Import Stock Items   |   |
| Filename           |  |   |
|                    | <ul> <li>If imported items exist, update selling prices</li> </ul> |   |
|                    | Import Promotions  |   |
| Filename           | PROMO.TXT  |   |
|                    |  |   |

Specify the Import Folder location of where you will be placing the Import files.

Then specify the name of the promotion file that you will be importing under Import Promotions - Filename.

The format of the promotion file needs to be as per the format that's documented on the 'Import Promotions' section of the User Guide.

For completeness, the promotion format has been included below:

ZONE – Currently unused but included for future plans. Header must be included but data can be left blank. DESCRIPTION – Promotion Description.

TRIP\_QUANTITY – The number of items required to purchase to trip the promotion.

PROMO\_PRICE – Price of the promotion.

START\_DATE – Start date of the promotion.

END\_DATE – End date of the promotion.

ITEM\_CODE – Stock items to be included in the promotion.

CUSTOMER\_TYPE or CUSTOMERTYPE - Customer Type Code

CUSTOMERTYPERANGE or CUSTOMER\_TYPE\_RANGE - The range of Customer Type Codes expressed as 1-4, 16.

Anything fields that contain a comma must be contained within quotes, so "1-4, 16".

POS or POS\_NUMBER or TERMINAL - POS Terminal Code

POS\_RANGE - POS Terminal Code range expressed as 1-4, 16. Anything fields that contain a comma must be contained within quotes, so "1-4, 16".

LOCATION - The Location Code

LOCATION\_RANGE - The Location Code range expressed as 1-4, 16. Anything fields that contain a comma must be contained within quotes, so "1-4, 16".

SITE - The Site Code

SITE\_RANGE - The Site Code range expressed as 1-4, 16. Anything fields that contain a comma must be contained within quotes, so "1-4, 16".

PRICE\_LEVEL - The Price Level Code.

As the POS Range, Location Range, Site Range, Price Level all share the same field, whichever field comes first will take precedence if you have a record that has data in both fields.

Here is an example of a promotion file:

| 1 | Α    | В                  | С             | D           | E          | F         | G         |

| 1,Z1-S20-WINE-3FOR20,3,20,01-Apr-18,31-Aug-18,3                                |
| 1,Z1-S20-WINE-3FOR20,3,20,01-Apr-18,31-Aug-18,4                                |
| 1,Z1-S20-WINE-3FOR20,2,20,01-Apr-18,31-Aug-18,5                                |
| 1,Z1-S20-WINE-3FOR20,2,20,01-Apr-18,31-Aug-18,6                                |
| 1,Z1-S20-WINE-3FOR20,2,20,01-Apr-18,31-Aug-18,7                                |
| 1,Z1-S20-WINE-3FOR20,2,20,01-Apr-18,31-Aug-18,8                                |

Once the Promotion file has been created and saved with a name of PROMO.TXT, copy it into Import Folder location (in the above example, the location and name of the promo file is C:\Import\PROMO.TXT). When copied to the configured location, the Promotion File will then be imported automatically and will appear in Promotions.

Go to File > Sales > Promotions > Promotions

| Code Description    | Group     | Discount     | Date Range            | Time Range | Days      | Selection Range | Cust Type Range | Priority |
|---------------------|-----------|--------------|-----------------------|------------|-----------|-----------------|-----------------|----------|
| 26 Z1-S20-WINE-3FOR | R20 PROMO | \$20.00 Each | 01 Apr 18 - 31 Aug 18 | All Day    | Every Day |                 |                 | 26       |

View the promotion by double clicking on it or selecting it and press the 'Modify' button to see the details of the promotion which was imported as per the promotion file.

#### Auto Import Supplier Invoices – Can find Supplier by Code

Previously, Idealpos would look up a Supplier by Supplier name. Idealpos has now been updated to look up the Supplier by Supplier Code if the Supplier name cannot be found.

Go to Setup > POS Terminals > Modify > Import/Export > Supplier Invoices > Retrieve Supplier from Filename

Enter the location of the Supplier name or Supplier code using the information in the filename.

E.g. To retrieve the Supplier Name from a filename of "Warehouse – ALM.csv", you would set the "Retrieve Supplier from Filename - Right of" setting as "-" and the "Retrieve Supplier from Filename - Left of" setting as "." Idealpos will retrieve the Supplier name of "ALM" from a filename of "Warehouse – ALM.csv" using the above "Right of" and "Left of" settings.

If the filename contains the Supplier Code instead of the Supplier Name, Idealpos will retrieve and search for the Supplier Code instead.

E.g. For a filename of "Warehouse – 1.csv", Idealpos will retrieve a Supplier Code of 1 using the "Left of" and "Right of" settings that have been described above.

### Invoices

### Long Description Support on A4 Invoices when using Stock Notes for Long Descriptions option

This function adds support for Long Descriptions to be displayed in their entirety on A4 Invoices when the Stock Notes for Long Descriptions option has been enabled.

Go to Setup > Yes/No Options > Miscellaneous > Enable: Use Stock Notes Field for Long Descriptions

|   | ALL                   | 1 |
|---|-----------------------|---|
| MISCELLANEOUS                               |                       |   |
| Use Stock Notes Field for Long Descriptions | <ul> <li>✓</li> </ul> |   |

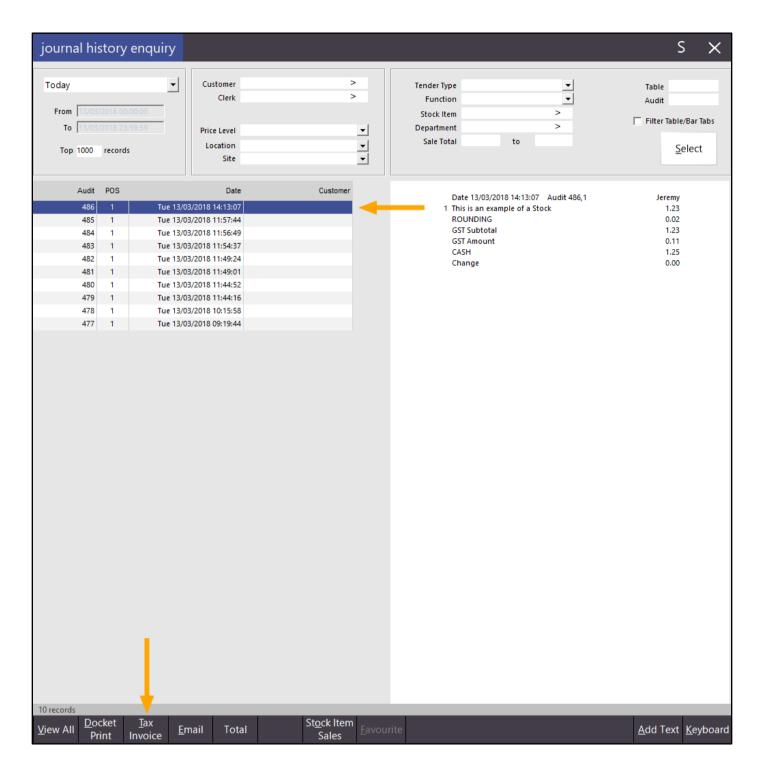

## When enabling the above setting, the Stock Notes field will be used to handle Stock Item Descriptions and you will lose access to the Stock Notes features.

After enabling the above Yes/No option, a long Stock Item Description can be entered against the Stock Item.

Go to File > Stock Control > Stock Items > Select: Stock Item > Modify > Update Description Field: Enter a long description into the Description field > Save

| stock items   | <u>G</u> eneral                                      | Ad <u>v</u> anced Indirect Item   | Created 04 Dec 2017 16:21:40   |

## Log Out

### **Hide Backoffice screen**

This function hides the Backoffice screen after logging out of Idealpos.

This prevents unauthorised staff from seeing the figures that were displayed on the Dashboard by the last logged in user.

This function is hard-coded and there are no configuration changes required.

Go to File > Log Out

The Backoffice screen is now hidden and only the Idealpos 7 logon screen is displayed on the screen.

## **Pending Sales**

#### **Ability to Email Pending Sales**

The ability to send a customer a Pending Sale as an email is now available in Idealpos.

Pending Sales are used to save a sale for use at a later stage.

For complete details about configuring Pending Sales in Idealpos, please search for Pending Sales in our Support User Guide available on the Idealpos website.

In order to use the Email Pending Sales feature, you will need to ensure that the Outgoing Email Server is configured in Idealpos.

Go to Setup > Global Options > Other Options > Email Settings

| Email Settings                 |            |                |      |                         |  |

Enter the details that are used by your email server. You may need to request these settings from your Internet Service Provider or from the Email Service that you use to send/receive your emails.

By default, the Pending Sale Descriptor is set as 'Table'. The Descriptor appears on the top right corner of any Pending Sales that you email to your customers. Therefore, you may want to change this to Pending Sale or to another Description that you prefer.

Go to Setup > Function Descriptors > Pending Sale > Modify

| function descriptors |                          | ×            |

|                      |                          | <u>S</u> ave |

Enter your preferred Description for Pending Sales into the Description field, then press the 'Save' button.

Open the Idealpos POS screen, then add the Customer to the sale if they exist in your database, then add the Stock Items you want in your Pending Sale by selecting them from the POS Screen, or alternatively scan the Stock Item barcodes if they are barcoded and you have a barcode scanner. Then press the Pending Sale button.

**Pending Sale** 

If you added a Customer to the transaction, their details will be pre-filled in the below screen, otherwise you may enter their details. POS only requires the Code, the other fields are optional.

### Pending Sale Deletions - Items recorded in Journal and Activity Log

This function adds the ability to see the Stock Items that were added to a Pending Sale after a Pending Sale has been deleted. After a Pending Sale is deleted, the Pending Sale and the Stock Items it contained will be recorded in the Journal and Activity Log.

Go to POS Screen and add required Stock Items to the transaction. If the sale is being created for a Customer, ensure that you add the Customer to the sale. Then press the 'Pending' button

The 'Save Pending Sale' screen will appear.

If you selected a Customer during the sale, the Customer's details will appear.

Otherwise, enter the details of the Customer which the Pending Sale is being created for (Name, Address, Suburb, State and Post Code), select the Type of Pending Sale (None, Takeaway, Delivery, Pickup, Cater) then press the 'Save' button.

### **Promotions**

### Can set specific Priorities / Move to Top and Bottom

This function adds the ability to set a Priority for a Promotion by selecting a Promotion from the list then entering a numeric value for the Priority.

It also adds the ability to move a Promotion to the top or bottom of the list.

Go to File > Sales > Promotions > Promotions > Change Priority

|     | promotions                    | All Promotions        | 5                 | <b>T</b>              | >             | Expiring  | 🔽 🗌 Hide E      | (pired 🗿        | s >      |

## Reports

### Financial Summary Report – Gross Sales field added

This function allows you to report on the Gross Sales of your selected period when running the Financial Summary Report.

Go to Reports > Financial > Financial Summary

| financial summary re                   | eport  |      |  |            | ×            |

### Financial Summary Report – Support for Dynamic Grouping in Shortcut Reports

This function adds support for creating Shortcut Reports with Dynamic Grouping. This then allows those Shortcut Reports to use Dynamic Grouping selections that were made when the Reports were initially created.

Go to Reports > Financial > Financial Summary

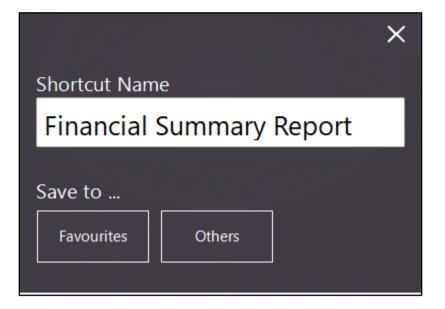

Select the criteria that you want included in your Shortcut Report. The Dynamic Grouping selections that are now supported in the Shortcut Report are illustrated below.

| financial summary rep                  | port  | ×            |
|--|---|--------------|
|  | Date Range         Year to Date         Year to Date         To         07/03/2018 23:59:59         Report Options         Selected Fields (max 12)         Selected Fields (max 12)         Pross Sales         Nett Sales (incl.tax)         Number of Tiansactions         Number of Tiansactions         Number of Tansactions         Number of Tansactions         Number of Total BEVERAGE         Other Categories         Todal FOOD         Tender 1 in Drawer [CASH]         Tender 3 in Drawer [CHEQUE]         Tender 6 in Drawer [CHEQUE]         Tender 6 in Drawer [CHEQUE]         Tender 1 in Drawer [CNEDEM 11]         Tender 1 in Drawer [CNEDEM 12] |              |
|  | Clerk Code     >       Location     >       POS System     >  |              |
| <u>P</u> rint <u>S</u> ave<br>Defaults |   | <u>V</u> iew |

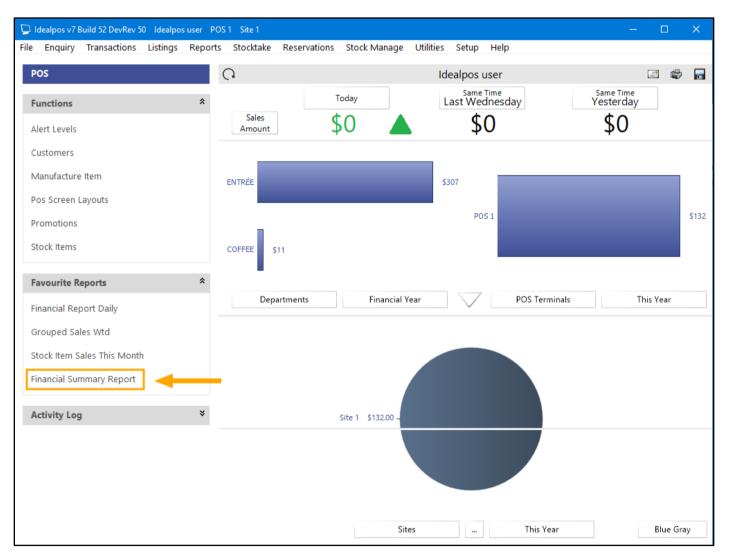

Press the 'View' button to run the report.

When the report is displayed on the screen, press the Shortcut button (S) on the top right corner of the window to create a shortcut for the report.

Enter a Shortcut Name for the report and select the location where you want the shortcut for the report to be saved.

The report can now be run anytime by selecting it from the Favourite Reports section which is located on the left-hand side of the Dashboard on the main Idealpos window.

The Shortcut Report can also be scheduled to run.

Note that before setting up Schedules, ensure that your Email Settings have been configured in Idealpos Go to Setup > Schedules > Add

Complete each of the fields with the options that you want to use to run the scheduled Shortcut Report. Drag and drop the newly created Shortcut Report from the Shortcut Reports Available section into the scheduled reports section.

#### **Re-Order Report – Add option for Manufactured Items**

This function adds the ability to report on Manufactured Items that need to be re-ordered.

Since Manufactured Items are Stock Items that are Manufactured in-house, any Manufactured Items that appear on the Re-Order Report simply mean that these items need to be manufactured.

When running the Re-Order Report with the 'Manufactured Items' option ticked, the system will look for Stock Items which have the 'Manufactured Item' checkbox enabled and need to be re-ordered. The quantities recorded against the Stock Level, Recommended Level and Reorder Level are all used to determine whether a Stock Item needs to be ordered.

When the current Stock Level of a Manufactured Stock Item is less than the Reorder Level AND the Recommended Level is higher than the current Stock Level, the Item will be displayed on the Re-Order Report. The Reorder Quantity that is displayed on the Re-Order report against the Stock Item will be the quantity that is needed to increase the Quantity of the Stock Item back to the Recommended Level.

Go to Reports > Stock Control > Re-Order > Select: Manufactured Items

| reorder report |                                       |     |       |   |   | ×            |

### **Restaurant & Table Map**

### Support for Alpha Table Codes

This function enables the ability to setup tables with alphanumeric codes (e.g. 100A, Couch1, etc.).

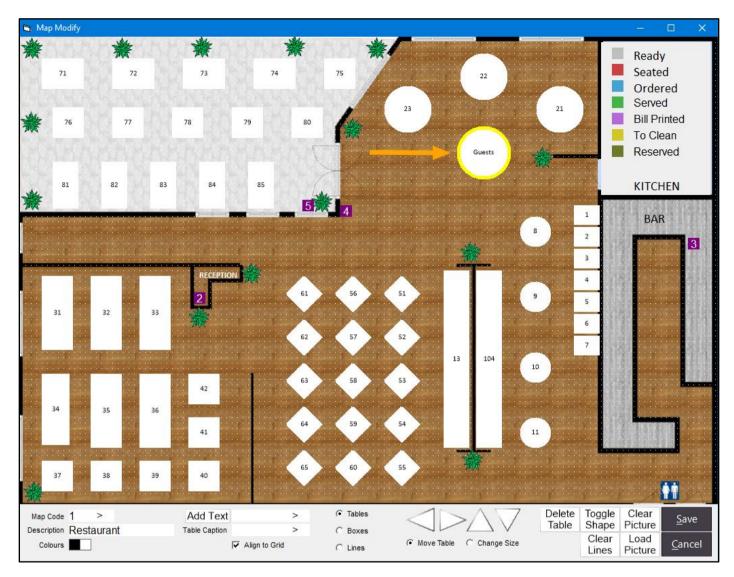

Go to Setup > Restaurant > Table Maps > Select: Table Map > Modify

Enter a caption for the table into the 'Table Caption' field located at the bottom of the Map Modify screen.

| Map Code 1 ><br>Description Restaurant | Add Text > Table Caption Guests > | Tables O Boxes |                              | Delete<br>Table | Toggle<br>Shape | Clear<br>Picture | <u>S</u> ave   |
|--|-----------------------------------|----------------|------------------------------|-----------------|-----------------|------------------|----------------|
|  | Align to Grid                     | C Lines        | Move Table     O Change Size |                 | Clear<br>Lines  | Load<br>Picture  | <u>C</u> ancel |

Then select a table on the map by clicking on it. The caption will be applied to the selected table.

Once you have finished making changes to the Table Map, press the 'Save' button.

The table will now show the caption on the Table Map.

When Kitchen Receipts are printed, the caption will be printed in place of the Table Number that would have previously been printed for the table.

#### Please note that support for Alpha Table Codes on the Ideal Handheld app will be released shortly. In the meantime, Tables will appear on the Handheld app with the Table Number that was set for the table at the time the table was created.

#### **Unlock Permissions button for Table Details**

This function adds an 'Unlock Permissions' button to the Table Details screen.

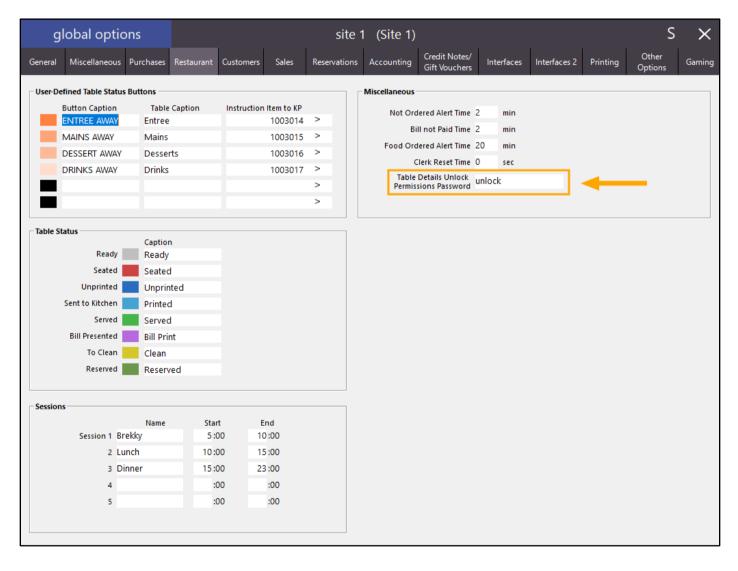

The 'Unlock Permissions' button allows a manager or supervisor to temporarily unlock all functions on the Table Details screen using a pre-configured 'Table Details Unlock Permissions Password'.

This function is used when a Clerk has restrictions imposed on them (e.g. their ability to Pay, Transfer, Bill, Delete or Finish under the Table Map option is disabled in the Clerk security settings).

When a Clerk with restricted access needs to perform one of the above functions, they will call a supervisor over who will press the 'Unlock Permissions' button then enter the password. After the password has been eAll functions are temporarily unlocked for the current Table Details screen which allows them to perform the task (Pay, Transfer, Bill, Delete or Finish) that is required (while they are under supervision of the supervisor or manager).

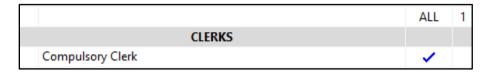

Once the required operation has been completed and the Table Details screen is closed, all security functions will return to normal. The next time the Clerk presses the 'Details' button for a table, the standard restrictions that have been imposed on that Clerk will apply.

Go to Setup > Global Options > Restaurant > Miscellaneous > Table Details Unlock Permissions Password

For the above setting to be effective, you need to have a Clerk which has security restrictions applied to them on the Table Map. You also need to have 'Compulsory Clerk' and Require 'Clerk Entry on Table Map' enabled in the Yes/No options.

To enable 'Compulsory Clerk' and 'Clerk Entry on Table Map', Go to Setup > Yes/No Options > Clerks > Enter Keyword Search: Compulsory Clerk

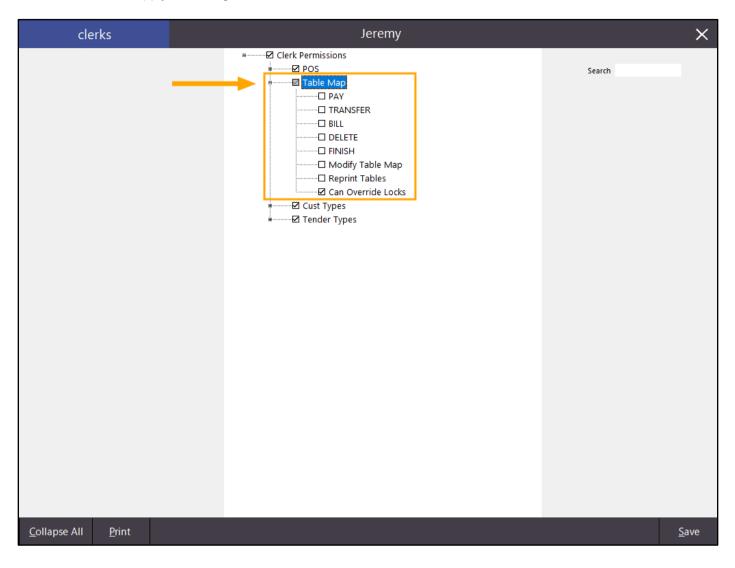

Go to Setup > Yes/No Options > Clerks > Enter Keyword Search: Clerk Entry

|                                  | ALL  | 1 |

Then under Clerk Permissions > Table Map, enable/disable the options that the Clerk should have access to, then press the 'Save' button to apply the changes

Open the Idealpos POS Screen and login using the clerk that has had the permissions applied to them Press the 'Table Map' button, select a table that contains an Order on it then press the 'Details' button

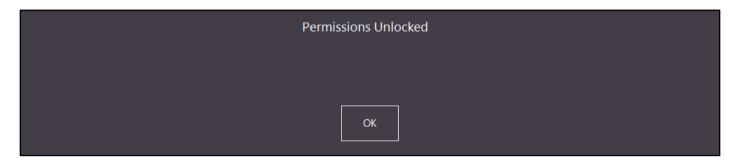

#### Then press the 'Unlock Permissions' button

The following prompt will appear. All functions will now be temporarily unlocked – the clerk may now perform any of the Table Map actions that are normally not available to them.

Once the required actions have been performed under the supervision of the supervisor/manager, close the Table Details screen. After closing the Table Details screen, the Permissions for that Clerk will be locked.

### Setup – Clerks/Users

#### **Clerk/User Permissions for Tender Types**

This function allows you to control which Users/Clerks have access to specific Tender Types. E.g. You can stop a specific Clerk or User from finalising a transaction using the EFTPOS Tender

To configure Tender Types for a particular Clerk, go to: Setup > Clerks > Select Clerk > Permissions

| clerks       |             | Code Sea | arch  | > |           |                |             | S | ×     |

| <u>C</u> ollapse All <u>P</u> rint |        | <u>S</u> ave |

Any Tender Types that have been enabled for the Clerk will continue to work as normal.

When the Clerk attempts to use a Tender Type that they don't have permission to use, the POS will display the following prompt.

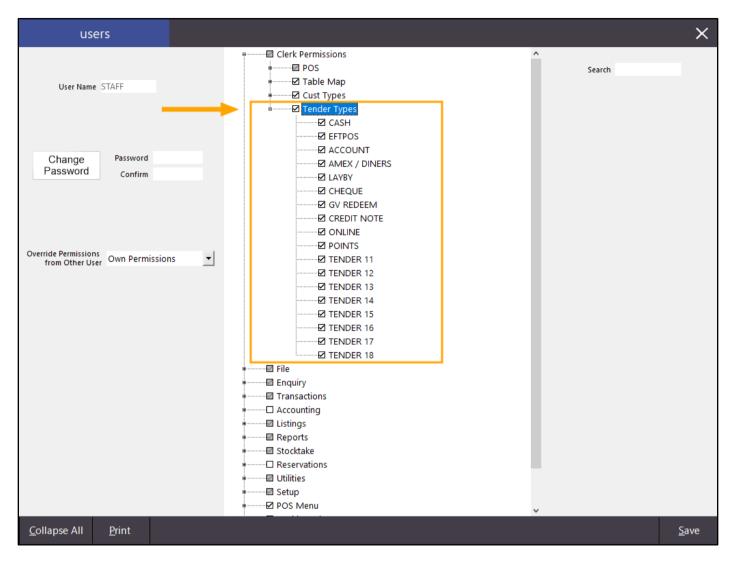

In addition to having the ability to set Tender Type access for Clerks, the same can be configured for a User. When a Tender Type is disabled for a specific User, any Clerk that is linked to that User will also be denied access to that Tender Type, even if access to the Tender Type has been enabled under the Clerk level access (Setup > Clerks > Permissions).

Go to Setup > Users > Select User Name > Modify

Under Clerk Permissions > Tender Types, tick/untick the Tender Types that you want the User to have access to, then press the 'Save' button save changes

When a Clerk that is linked to the User attempts to use a Tender Type that has been disabled, they will see the following prompt.

### Setup – Global Options

#### Ability to specify a default Customer Photo Location

This function allows you to specify the default location for Customer Photos.

When a Customer doesn't have a photo programmed against their customer record in the system, the system will look into the Photo Folder and look for a Photo that matches the customer number.

If a match is found, the photo will be displayed when the Customer is selected during a POS transaction.

Note that when a Photo Folder is configured and a match exists for the Customer, the photo for the Customer will not be displayed when viewing the Customer record in File > Customers > Customers.

It will only display the photo when the Customer has been selected during a POS transaction.

Go to Setup > Global Options > Customers > Photo Folder

Enter a location into the Photo Folder field that contains Customer Photos.

The filename of the Customer Photo needs to match the Code that has been assigned to the Customer and photos should be in JPG format.

To check if they have a Photo assigned to them, click on the Advanced tab in the Modify Customer screen. The Photo Location field needs to be empty

In addition to the Code and as mentioned previously, the Customer's Photo that exists in the Photo Folder will only be used if the Customer doesn't already have a Photo assigned to them.

Copy the photo to the Photo Folder that's configured in Global Options as per the above steps

#### **RMS/Hirum Room Interface – Option to set Customer Type for new Customers**

This function allows you to specify a Customer Type for new RMS Customers. When customers are read from the RMS data file, they will be assigned to the Customer Type that has been selected.

Go to Setup > Global Options > Interfaces > Customer Type

| Room Interface   |                  |                 |          |  |
|------------------|------------------|-----------------|----------|--|
| Interface Type   | RMS              |                 | -        |  |
| Output from POS# | 1                | Customer Prefix |          |  |
|                  | C:\POS Interface |                 |          |  |
|                  |                  |                 |          |  |
| Tender Type      | ROOM             |                 | <u> </u> |  |
| Customer Type    | RMS Customers    | ;               | •        |  |
|                  |                  |                 |          |  |

Select the Customer Type that you want new RMS Customers assigned to.

If you don't already have an existing Customer Type that is suitable for RMS Customers, you may create a new Customer Type.

This can be done by going to File > Customers > Customer Types > Add

Configure the new Customer Type as required then press the 'Save' button to save changes.

Note that after adding a new Customer Type, you may need to restart Idealpos in order for the Customer Type to show as an available Customer Type from the Customer Type dropdown box in the above Room Interface settings.

### Setup – Network Printers

#### Redirected Kitchen Printer Jobs show where they were Redirected from

This function will print details at the top of the receipt that shows the name of the printers that the Kitchen Print Job was redirected from.

This function is hard-coded and there are no settings that need to be modified in order for the Kitchen Print Job to show where it was redirected from.

There are two ways a Print Job can be redirected from one printer to another, with both ways being triggered when the target printer is not available due to being turned off or not available.

Option one – When you attempt to print to a printer that's offline and redirect printer is not configured, the POS terminal will display a Printer Error box from where you can select the printer that you want to send the Print Job to.

After selecting the desired printer, the Kitchen Receipt will print and will show the Kitchen Print Job will show the printer from where it was redirected from.

Option two – When you attempt to print to a printer that's offline and redirect printer is configured, the POS terminal will attempt to print to the redirected printer. If it is successful, the Kitchen Receipt will print to the redirected printer and will print the receipt showing the printer name from which it was redirected from.

In the event that the redirected printer is also not available, the POS terminal will display a Printer Error box from where you can select the printer that you want to send the Print Job to. The Kitchen Receipt will print showing the printer name from which it was redirected from.

When the Printer goes offline, any print job sent to it will be automatically redirected to the Redirect Printer that's selected in the 'Redirect Printer' dropdown box. The Print Job that was redirected will show the Printer where it was redirected from at the top of the Kitchen receipt.

Note that if there are multiple levels of Receipt Redirection, each level will be printed at the top of the receipt.

E.g. There are three printers in the system; Printer A, Printer B and Printer C.

The system is configured to print to the Kitchen Printer which is Printer C.

Printer C is configured to redirect to Printer B. Printer B is configured to redirect to Printer A.

Printer B and Printer C are both offline.

The Print Job tries to print to Printer C which fails.

It then redirects to Printer B which also fails then redirects to Printer A.

Printer A prints the Kitchen Receipt successfully and the Kitchen Receipt will show each printer that it was redirected from.

This aids in tracing each printer that the receipt was redirected from.

### Support for Multiple HC 100 Wristband Printers per Site

This function adds support for Multiple HC 100 Wristband Printers per site.

You will need to ensure that all Wristband printers have been configured in Idealpos - Network Printers.

Once all wristband printers have been configured in Network Printers, the printer that will be used for the printing of the wristband is configured within the Stock Notes of the Stock Item.

Go to Setup > Network Printers > Add

Enter a Printer Name, under Type, select 'Zebra HC100', then specify the IP address and Port (if it is not the default port of 9100). Then press 'Save' to save the printer. Repeat this step for each printer, ensuring that each HC100 printer has a unique Printer Name.

| <u>K</u> eyboard           |                                     |       |                 |                   |                                |        |       |   |                       | <u>S</u> ave |

The formula for what you want printed on the wristband needs to be entered along with the PRINTERNAME tag and the printer within the Stock Notes field. Please refer to the User Guide for more information about setting up tags. For the purpose of this guide, an example formula including the printer name has been included below: [WRISTBAND=TIME PRINTERNAME=Rides]

The above example should appear in the Stock Notes field as follows...

| Stock Notes |                                    |
|-------------|------------------------------------|
|             | [WRISTBAND=TIME PRINTERNAME=Rides] |
|             |                                    |
|             |                                    |
|             |                                    |
|             |                                    |
|             |                                    |
|             |                                    |
|             |                                    |
|             |                                    |

Repeat the above for each Stock Item that is used for printing a wristband ensuring that the printer has been correctly specified.

When printing the wristband, the wristband will print to the wristband printer that has been specified in the Stock Notes for the Stock Item.

### Setup – POS Terminals

#### **EFTPOS Settings – Assembly Payments EFTPOS Integration**

This function enables the ability to integrate Idealpos with Assembly Payments.

Before setting up Assembly Payments, you need to be licenced to use Assembly Payments. You also need to be setup with Assembly Payments as your EFTPOS service provider. Speak to Idealpos Sales for more information if you are interested in using Assembly Payments as your EFTPOS provider.

We recommend setting up the Assembly Payments Pinpad using a Wi-Fi connection. Therefore, it is a requirement that you have Wi-Fi connectivity at your site in order to use Assembly Payments.

To enable Assembly Payments Integration, go to:

Setup > POS Terminals > Select: POS Terminal > Modify > EFTPOS Settings > EFTPOS Type: Assembly Payments

| Ke | yboard          |         |                  |                 |                    |                     |                     |                     |                      |                          |                    |                           |   |

Ensure that the Disable box is unticked. If Disable is ticked, untick the box to enable EFTPOS.

Enter the IP address of the Pinpad into the IP Address field on the bottom right corner of the EFTPOS Settings window, then press the Pair button. Follow the remaining instructions on-screen and on the pinpad.

For more detailed information on setting up Assembly Payments, please refer to the EFTPOS – Assembly Payments section in the User Guide which is available on our website.

#### Region - Saudi Arabia – Tax System same as Canadian region setting

The Tax System in Saudi Arabia has changed to include VAT taxes.

Therefore, Idealpos has been updated so that when the Saudi Arabia region is selected, the Tax System that's used will be the same as the Tax System used by the Canadian setting.

We highly recommend that any customers in Saudi Arabia should take a backup and print out all reports up to the current date before they upgrade to this new build.

You can check what Region the POS has been set to by going to Setup > POS Terminals > Modify > Region

#### Support for Tyro Pinpad Surcharging

Idealpos now supports Tyro Pinpad surcharging based on the card presented.

There are two modes for this. Both are controlled from settings in Tyro.

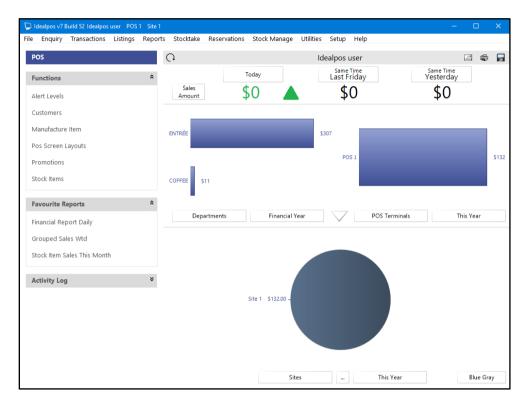

- The default mode (set from Tyro) is to have the surcharges deducted from the settlement amounts. Tyro then sends the settlement amounts without the surcharges, so that Idealpos will balance with the Tyro settlement
- You can also configure Tyro to have the settlement amounts sent to Idealpos as part of the settlement. If using this mode, you must set the Surcharges to a Stock Item in Global Options > Sales > Undistributed Links. Idealpos then adds the surcharges to the item specified.

### Shortcuts

#### Ability to add Log Out function to Shortcut Bar

This function allows you to add the Log Out function to the Shortcut Bar located on the left-hand side of the Dashboard on the main Idealpos window. The shortcut can then be used to Log Out of Idealpos

On the left-hand side of the Dashboard, right click on the Functions heading and select 'Add Log Out Menu'

The Log Out Shortcut will then appear in the Functions menu which can be used to Log Out of Idealpos

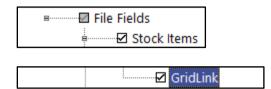

### Stock Control

#### Stock Items Grid – Show Grid Link Field

This function enables the Grid Link Field to be displayed in the Stock Items Grid.

Go to Setup > Users > Modify > File Fields > Stock Items > GridLink

Enable the GridLink option, then press the Save button to save the change.

After the GridLink option has been enabled for the User, close the Users screen, return to the main Idealpos dashboard, then open the Stock Items screen.

Go to File > Stock Control > Stock Items

The GridLink option will be displayed at the far right-hand side of the Stock Items grid

|             |              |           | E <u>d</u> it<br>Mode | M <u>u</u> lti<br>Select |
|-------------|--------------|-----------|-----------------------|--------------------------|
| Stock Notes | Manufactured | Grid Link |                       |                          |
|             |              |           |                       |                          |
|             | No           | 118 <     |                       | -                        |
|             | No           | 0         |                       |                          |
|             | No           | 0         |                       |                          |
|             | No           | 0         |                       |                          |

Stock Items can also be sorted by the Grid Link column. Click on the Grid Link header and the Stock Items will sort by the Grid Link column. Pressing on the Grid Link header multiple times toggles the order that the column is being sorted by (i.e. Ascending or Descending).

The Grid Link option that is displayed in the Stock Items grid corresponds to the Link to Grid setting that is configured within the Stock Item. Open the Stock Item then click on the Advanced tab.

### Support for longer Alternate Codes

Idealpos has been updated to support longer Stock Item Alternate Codes. The maximum allowed Alternate Code length has increased to 30. There is no configuration required for this to take effect.

Go to File > Stock Control > Stock Items > Select Stock Item > Alternate Codes

|                                   |                                 |                | <u> </u>    |                |
|                                   |                                 | <u>D</u> elete | <u>A</u> dd | <u>M</u> odify |

Enter the Alternate Code for the Stock Item.

An alphanumeric Alternate Code of up to 30 characters may now been entered. Once the code has been entered, press the 'Save' button.

| Stock Code     | 1                          |  |
|----------------|----------------------------|--|
|                | Test Stock Item            |  |
| Alternate Code | ABC12345678901234567890123 |  |
|                |                            |  |

The Alternate Code has now been saved for the Stock Item.

From the Stock Items screen, select the Stock Item then press the 'Alternate Codes' button. The saved Alternate Code will be displayed

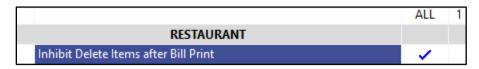

| Stock Code  | 1                     |  |

### Yes/No Options

### Inhibit Delete Items after Bill Print

This option will disable the ability to delete items from a table once a bill has been printed for that table.

Go to Setup > Yes/No Options > Restaurant > Inhibit Delete Items after Bill Print

Open the POS Screen and add items to the sale

Save the items to a table by pressing the 'TABLE MAP' button, select a table from the Table Map then enter the number of Covers and press OK.

Then open the Table Map, select the table and press the Details button.

Items can be deleted from the table before the bill has been printed by selecting the item and pressing the 'Delete' button.

The following prompt will be displayed.

The item that you attempted to delete will remain in the order.

#### Inhibit Order Number on Table Kitchen Prints

This function prevents the Order Number from printing on Table Kitchen Prints.

Go to Setup > Yes/No Options > Receipt/Kitchen > Inhibit Order Number on Table Kitchen Prints

|  | ALL | 1 |
|--|-----|---|
| RECEIPT / KITCHEN                            |     |   |
| Inhibit Order Number on Table Kitchen Prints | - 🗸 |   |

When you enter an Order Number into a sale that also contains Stock Items which print to a Kitchen Printer and save the sale to a table, the Order Number will not be printed on the Kitchen Printout.

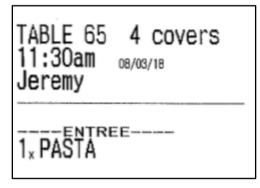

If the Inhibit Option is not enabled, the Order Number will print to the Kitchen Print in the above scenario.

Note that this option only affects Table Kitchen Prints. If you add Kitchen Print Stock Items to a sale and then tender the sale (without saving the sale to a table), the Kitchen Print will still contain the Order Number.

Inhibit Order Number on Table Kitchen Prints unchecked (Order Number is printed on Kitchen Print)

| * ORDER 123 *<br>TABLE 65 4 covers<br>11:29am <sub>OB/C3/1B</sub><br>Jeremy |
|---|
| 1x PASTA  |

Inhibit Order Number on Table Kitchen Prints checked (Order Number is not printed on Kitchen Print)

### Inhibit Transactions for Locations with different Stock Location

This function will stop Transactions (Transfers, Purchases, Stocktakes) from occurring at a Location which has a Location other than its own Location set as the Stock Location.

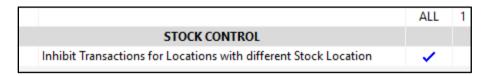

This function is useful for scenarios where a site has two locations such as a Mini Mart and a Café.

All Stock is located in the Café and the site does not want Transactions performed against the Mini Mart.

This function will allow you to stop Transactions (Transfers, Purchases, Stocktakes) from being performed at the Mini Mart location.

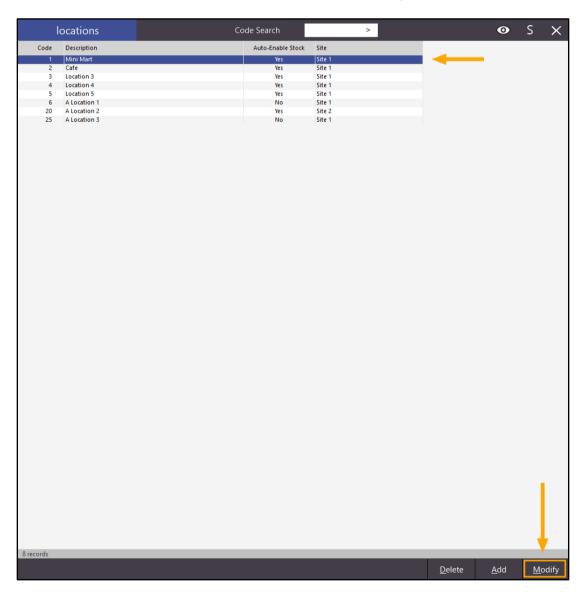

Before making changes regarding Stock Locations, we recommend that you create a backup of your Idealpos system. To backup your Idealpos system, go to File > Backup Database > OK

Go to Setup > Yes/No Options > Stock Control > Inhibit Transactions for Locations with different Stock Location

If required, setup/update your Locations so they reflect the Stock Location.

Go to File > Stock Control > Locations > Select: Location > Modify

Select the Stock Location from the Stock Location dropdown list which reflects the location of where the Stock is located for the current location then press Save to save the change.

| locations               | ×            |
|-------------------------|--------------|
|                         |              |
|                         |              |
|                         |              |
|                         |              |
| Code 1                  |              |
| Description Mini Mart   |              |
| Auto Enable Stock Items |              |
| Stock Location Cafe     |              |
| Site Site 1             |              |
|                         |              |
|                         |              |
| User-Defined Text       |              |
| IBA Store ID            |              |
|                         |              |
|                         |              |
|                         |              |
|                         |              |
|                         |              |
|                         |              |
|                         | <u>S</u> ave |

Using the above as an example, transactions (Transfers, Purchases or Stocktakes) will be inhibited. This means that the Mini Mart Location will not be shown as an available Location when performing Transfers, Purchases or Stocktakes.

The Mini Mart Location is now hidden on the Transfers, Purchases and Stocktake screens

| stock transfers |                 |                              |                     | × |

### Jackpot/Raffles are shown on Customer Display

This function displays the Jackpot or Raffle winner on the Customer Display when a Jackpot or Raffle is drawn. This function is enabled by default. In order to see Jackpot/Raffle winners on the Customer Display, you must also have a physical Customer Display installed and enabled.

Go to Setup > Yes/No Options > Miscellaneous > Jackpot/Raffles are shown on Customer Display

To ensure that Idealpos is enabled to use your installed Customer Display, go to:

Setup > POS Terminals > Modify > Customer Display > Resolution > Select the resolution of your Customer Display, Display Format > Select your desired display format for the Customer Display

Then go to the POS Screen and draw a Jackpot or Raffle by pressing the Jackpot or Raffle button on your POS screen. The Jackpot or Raffle winner will be displayed on both the POS Screen and the Customer Display.

For complete details about using Jackpots and Raffles in Idealpos, please search for either Jackpot or Raffles in our Support User Guide available on the Idealpos website.

#### Print Large Order Number

This function configures the receipt to print Order Numbers in large font type if an Order Number is entered during a sale.

Go to Setup > Yes/No Options > Receipt/Kitchen > Print Large Order Number

During a sale on the POS Screen, press the Order Number button, or enter a number and then press the Order Number button.

If you just selected the Order Number button or have the option to Force Order Entry, the sales screen will prompt you to enter a number. Enter the Order Number and press the 'Enter' button.

Add items to the sale then tender the sale.

After you tender the sale, the receipt will print out and will contain the Order Number printed in large font type.

#### **Print Order Number Dockets**

This function forces Idealpos to print an Order Number docket to the receipt printer when a sale is done that contains an Order Number. This function is useful for Quick Service businesses that assign Order Numbers for each order, then hand a copy of the Order Number docket to their customer. Then when the customer's order is ready for collection, the business will call out the order number.

Go to Setup > Yes/No Options > Receipt/Kitchen > Print Order Number Dockets

|                            | ALL | 1 |
|----------------------------|-----|---|
| RECEIPT / KITCHEN          |     |   |
| Print Order Number Dockets | 1   |   |

From the Idealpos POS screen, press the Order Number button, or enter a number and then press the Order Number button.

If you just selected the Order Number button or have the option to Force Order Entry, the sales screen will prompt you to enter a number. Enter the Order Number and press the 'Enter' button.

Add items to the sale then tender the sale.

The sale receipt will print followed by the Order Number docket. Any Kitchen Receipts will also print at the Kitchen Printers if Kitchen Printers have been configured.

If Receipt Printing is turned off, the Order Number docket will still print followed by any Kitchen Receipts if Kitchen Printers have been configured.
