

Handheld App – 4.0.19

Update Details:

** Enhancements

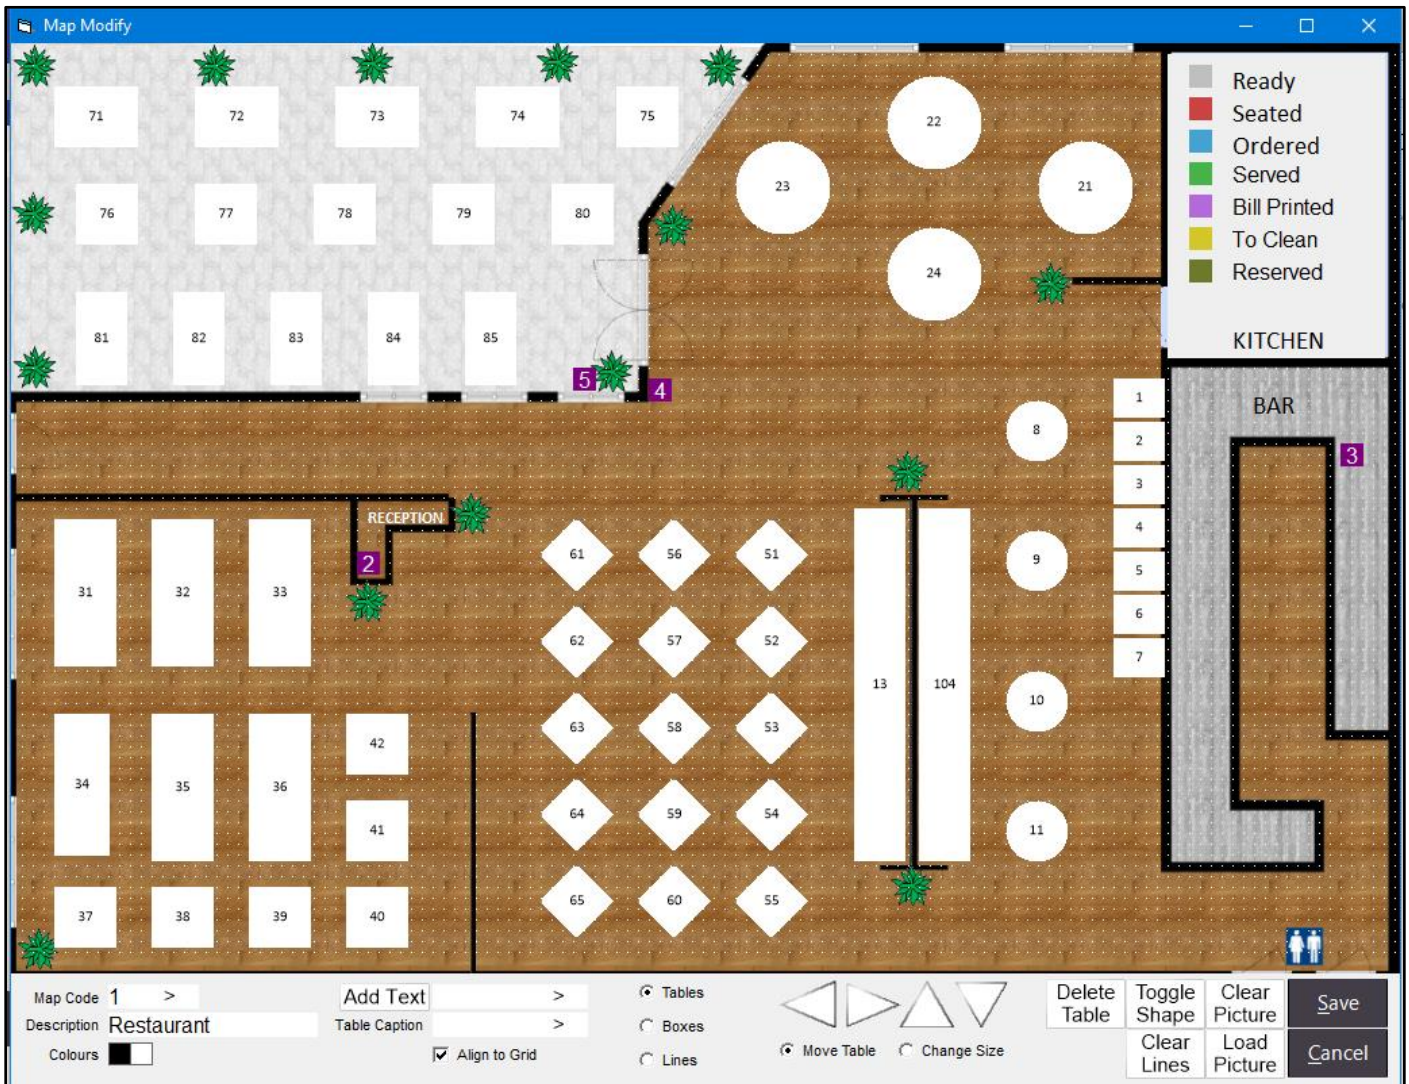

* Implement support for Alpha-Table Codes

Implement support for Alpha-Table Codes

This function enables the ability to setup tables with alphanumeric codes (e.g. 100A, Couch1, etc.).

To setup an Alpha-Table Code, go to

Go to Setup > Restaurant > Table Maps > Select: Table Map > Modify

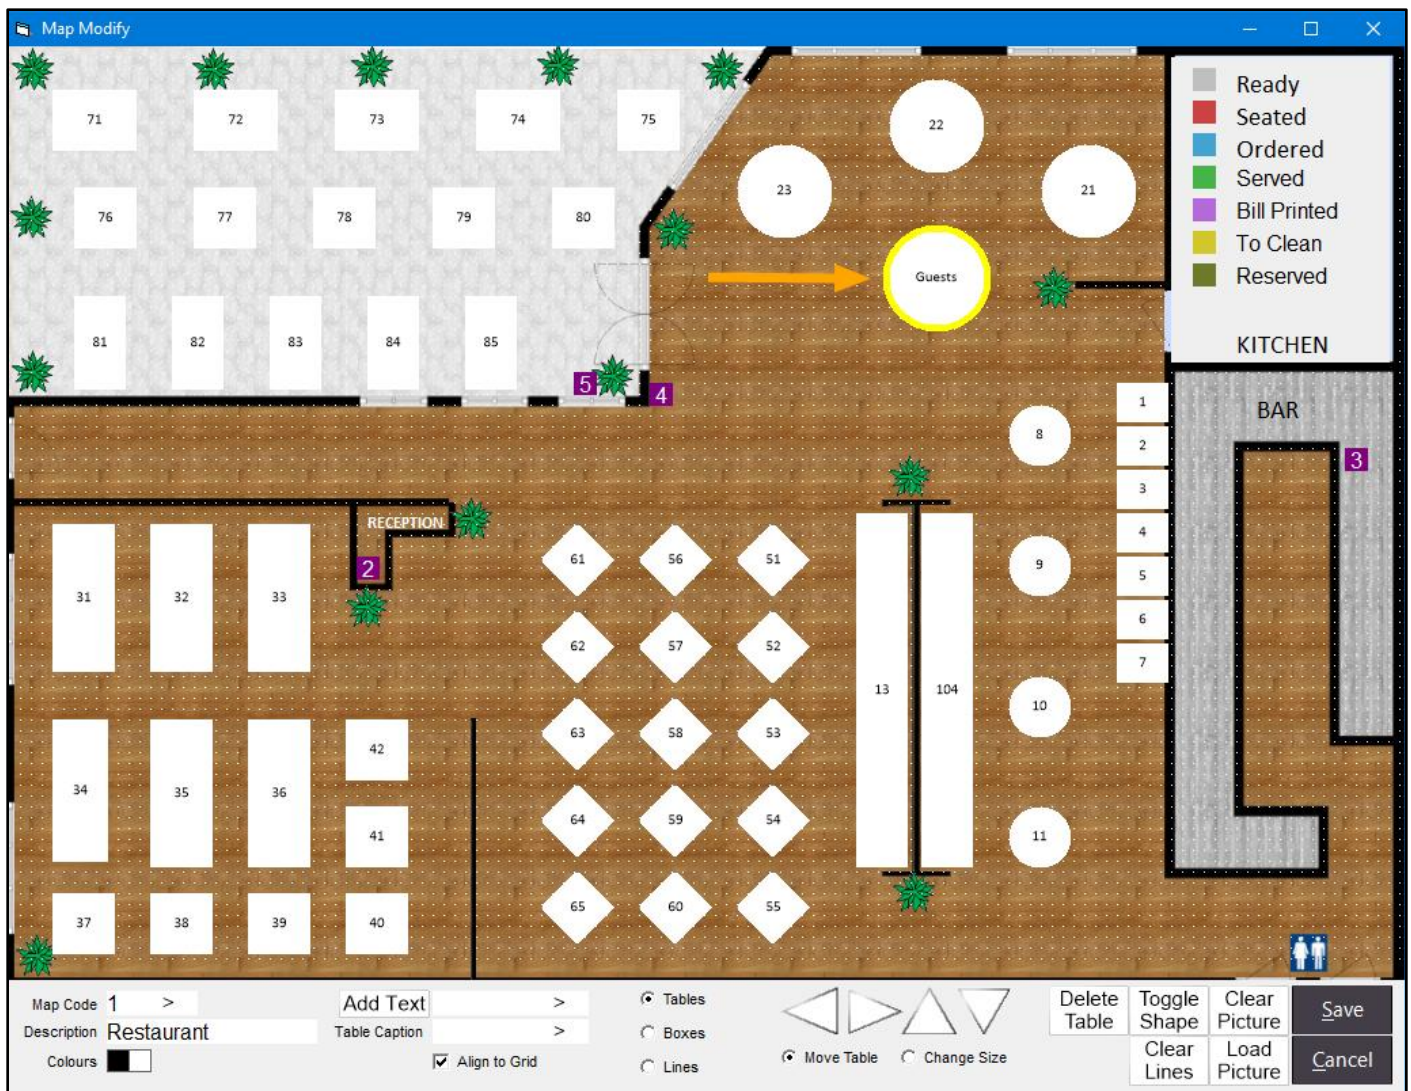

Enter a caption for the table into the 'Table Caption' field located at the bottom of the Map Modify screen.

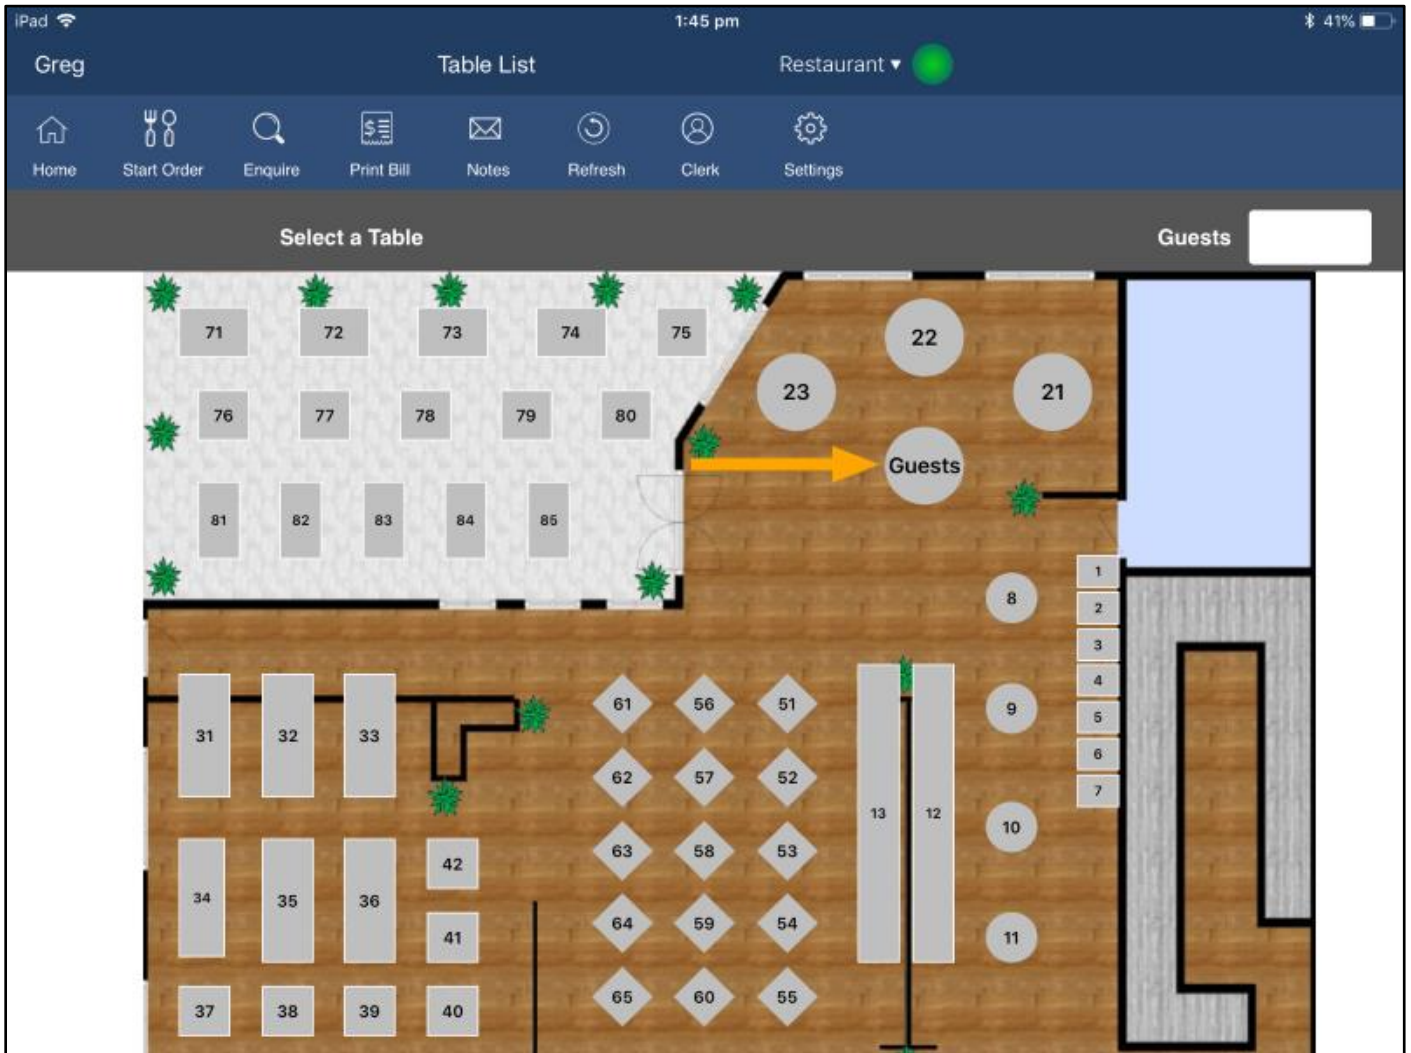

idealpos7 Update History

Then select a table on the map by clicking on it. The caption will be applied to the selected table.

Once you have finished making changes to the Table Map, press the 'Save' button.

On the Handheld app, click on Settings > Download Program Data.
After Program Data has been downloaded, the table will now show the caption on the Handheld app.

When Kitchen Receipts are printed, the caption will be printed in place of the Table Number that would have previously been printed for the table.
