

Build 12

Update Details:

Added: Force Receipt after No Sales yes/no option

Added: Hover Tips for Yes/No Options

Added: Search function in User Permissions screen

Added: Stock Item Grid - Field Search functionality

Added: Stock Item Reports support Chinese characters

Added: Mag Card Printing support for Zebra ZXP Series 3

Yes/No Options

Feature: Force Receipt after No Sales Yes/No Option

This feature will allow you to toggle if receipts will ignore any other print settings and force a receipt to the receipt printer when a No Sale is performed.

Go to Setup > Yes/No Options > Receipt/Kitchen: Force Receipt after a No Sale.

Force Receipt after a No Sale

Feature: Show Scale Preset Tare amounts on Receipts

This option will show the item's Preset Tare value on the receipt after the description. Some products when weighed will require a pre-tare to omit the weight of packaging not included in the Gross weight, so the customer is only charged the Net weight.

Show Scale Preset Tare amounts on Receipts

Feature: Yes/No Options Help

As there are over 350 different Yes/No Options within Idealpos, it is difficult to remember what each one does. If you press on the option text or hover over it with a mouse, a pop-up will display containing basic information on what it does. The information is the same as located in the User Guide but without images.

The screenshot shows the 'yes/no options' interface. At the top, there is a search bar with the text 'Enter Keyword Search' and a 'Clear' button. Below the search bar is a navigation menu with tabs for 'Clerks', 'Confirmation', 'Customers', 'Home Screen', 'Miscellaneous', 'POS Screen', 'Receipt / Kitchen', 'Restaurant', 'Stock Control', 'Tenders', and 'Help is ON'. The 'Clerks' tab is selected. The main area displays a list of options under the heading 'CLERKS'. A pop-up help tip is displayed over the option 'Employee Log inhibits Clerk Log onto Sale'. The help tip contains the following text: 'Employee Log inhibits Clerk Log onto Sale. If you require staff members to log on at the beginning of their shift, this will stop staff members who are not supposed to make sales from automatically being logged on the POS. This will prevent mistakes from being made by staff who are not authorized to use the POS. Generally this is for back of house staff that will not have any interaction with customers.'

	ALL	1

19	Overlapping Clerks	
20	Print Docket when Employee Logs Out	
21	Require Clerk Entry on Table Map	
22	Select Dynamic Employees with Grid	

The Help Tips are able to be toggled on or off with the button in the top right corner. It will display Help is ON or Help is OFF depending on your choice.

The screenshot shows the 'yes/no options' interface with the 'Help is ON' button highlighted by a red arrow. The interface is similar to the previous screenshot, but the help tip is not displayed. The 'Help is ON' button is located in the top right corner of the navigation menu.

When it is turned off the help will not display.

User Permissions

Feature: Search function in User Permissions screen

This feature now allows you to search for a permission that is in the list and easily access it.

Stock Items

Feature: Stock Item Grid - Field Search functionality

This feature allows you to quickly find a stock item by filtering each stock item detail you know about the item. Now you can easily find and edit a stock item anywhere in your list regardless of how you program your database.

If you have WildCard Searching on it will also work within these fields, otherwise you can preface the detail in the field with a * character. To turn on WildCard searching, go to Setup > Yes/No Options > Miscellaneous: WildCard Description searching by default.

WildCard Description searching by default

Go to File > Stock Control > Stock Items.

Underneath the column heading containing the stock item field is a entry field.

stock items		Description Search					
Code	Description	Department	Average	Stock Control	Indirect	PRICE 1	PRICE 2
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
1231	1 glass	INSTRUCTIONS	0.00	Yes	No	0.00	0.00
1181	1/2 Doz Fresh Oysters	ENTREE	0.00	Yes	No	13.50	13.50
1265	1/2 strength	COFFEE / TEA	0.00	Yes	No	0.00	0.00

In the column you choose, start typing anything to narrow down the item you are searching for. Any column that you have entered data in to will be highlighted as yellow.

Reports

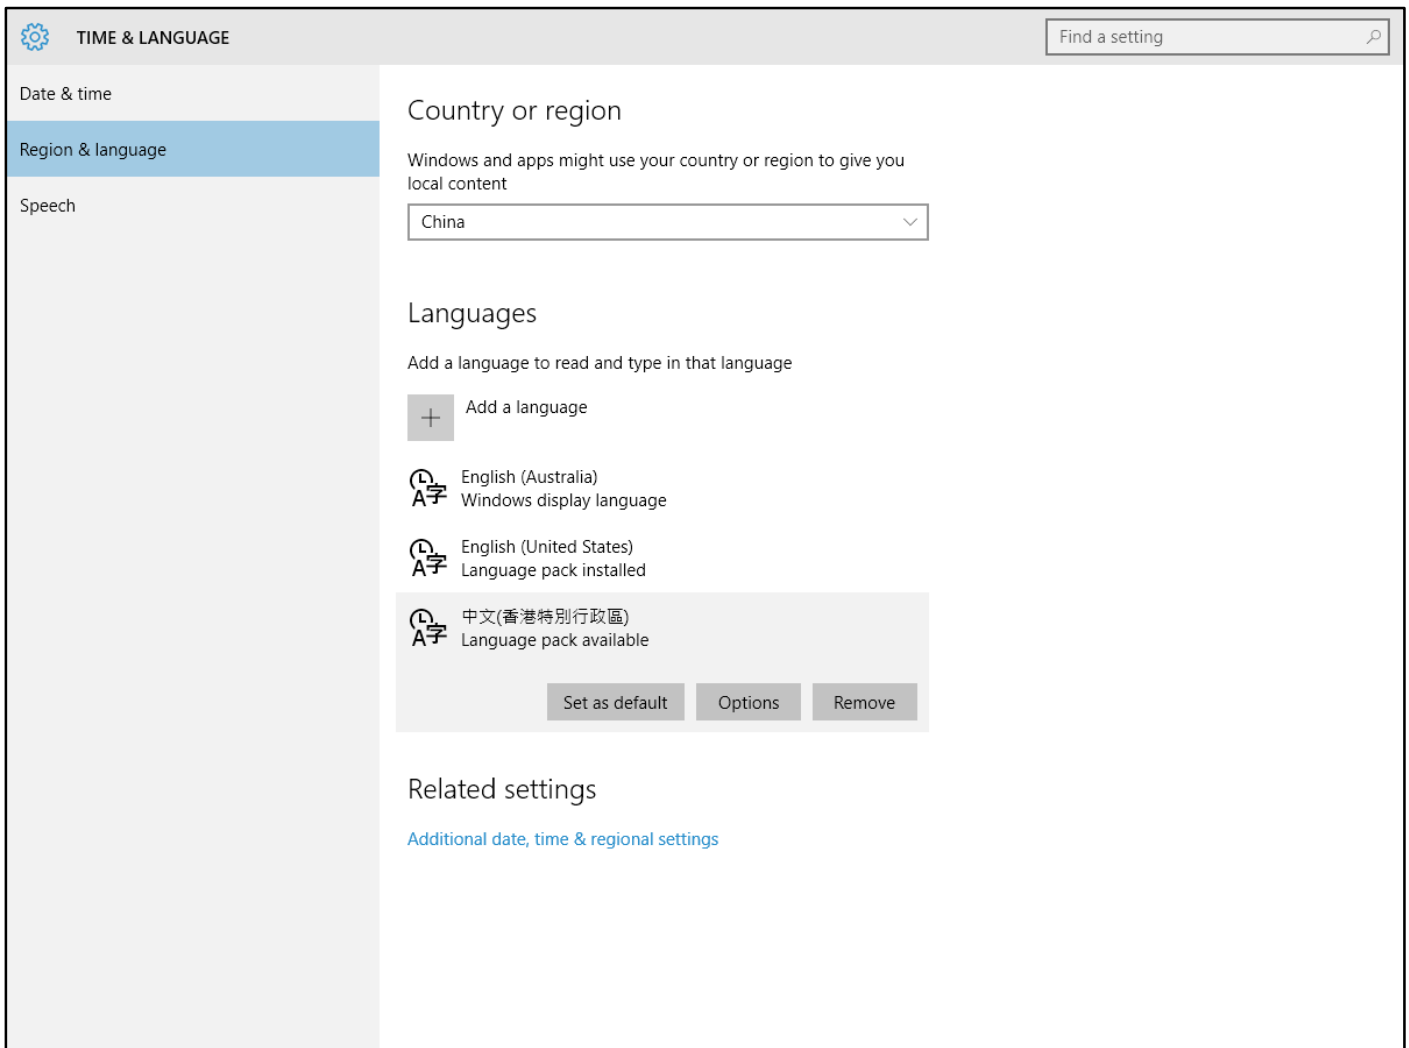

Feature: Stock Item Reports support Chinese characters

This feature will display any Chinese character Stock Items on Stock Item Reports. You must have your system configured to display Chinese characters.

Go to Setup > POS Terminals > Modify > POS Settings > User-Defined Options > Desc: CHINESE > Setting:1.

The Windows Regional and Language Setting and Locale must also be set to Chinese Traditional.

Description 1 will need to be set in Chinese characters.
